

Buddy Check Network's Solution to Stay Connected to Seniors

Bryn Mawr, PA - The Buddy Check Network, (www.mybuddycheck.com) has always made it easy to stay connected with elderly parents who live alone. Now it is even easier to monitor Mom or Dad's medical conditions with The Buddy Check Network's new Caregiver iPhone App launched today.

The Buddy Check Network (BCN), a division of the Web 2.0 company Caryl Technologies LLC, launched their Caregiver iPhone App to enable Boomers to stay in touch with loved ones who are monitored by My Buddy Check.

Registered users can receive detailed information about their loved one's health status right from their iPhone with this new App (www.mybuddycheck.com/iPhone). A touch of the screen gives members immediate access into the information from their loved one's monitoring call from The Buddy Check Network.

The BCN Caregiver App can also be used to schedule daily, weekly or a custom one-time reminder call to be sent to your iPhone so that you never forget your parent's doctor's appointment or a caregiver responsibility again.

The App is just one component of The Buddy Check Network, giving seniors and their caregivers a social safety network to keep them connected to the resources they need. The Buddy Check Network is also linked to Microsoft's Health Vault for secure medical record access by their designated medical team.

Based in Bryn Mawr, PA, Caryl Technologies is an innovative Web 2.0 company that integrates speech and internet technology with any mobile or standard telephone. Individuals can access a live demo of a Buddy Check service call anytime at 1-888-804-3624 to gain a better understanding of how this monitoring service meets the health and wellness needs of seniors and their caregivers.
