

THE BUDDY CHECK NETWORK

where innovation meets integration

- BCN allows participating providers to initiate a member monitoring service without costly infrastructure development or purchase.

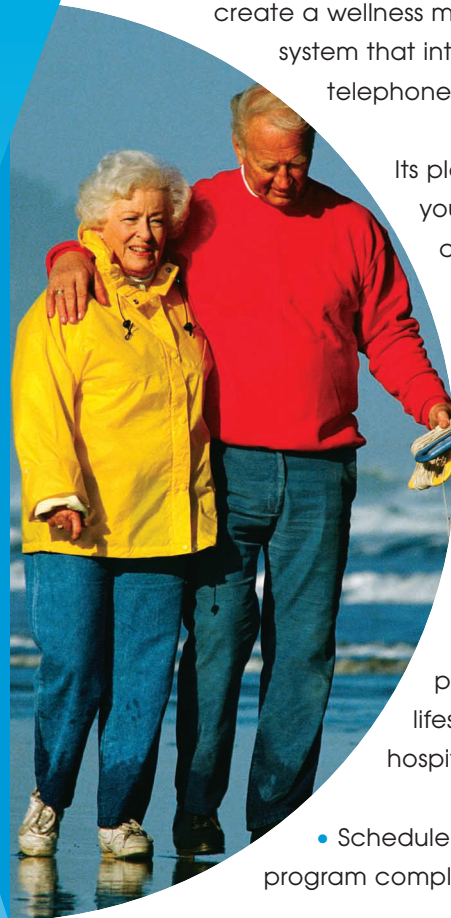

- The BCN offers peace of mind to your customers and their families with a scheduled call to prevent acute conditions stemming from isolation.

- BCN provides easy voice portal access to Microsoft's HealthVault, a personal medical information management tool for members and their medical support team.

- The Buddy Check Network is the premier service of Caryl Technologies, an innovative Web 2.0 company that integrates the power of speech and internet technology with any mobile or standard telephone.

Our innovative suite of phone-based services is just the tool you have been looking for to enhance your care management initiatives. The Buddy Check Network (BCN) harnesses the power of speech technology to create a wellness management system that integrates with any telephone system.

Its platform affords your members the connectivity they need to ensure preventive, predictive and personalized care.

- Proactive monitoring of medical conditions to promote healthy lifestyles and reduce hospitalization.

- Scheduled calls to gauge program compliance.

- Outreach and alert system for caregivers; your partners in meeting the health and wellness needs of your members.

- Communication to your members via our network increases your outreach and boosts retention.

- Supportive social network leads to changed behaviors.

- Collaborative care continuum set up within Microsoft's HealthVault allows for secure medical record storage and seamless information sharing regarding medication, treatment plans or wellness solutions. Safeguard your data with our network's unique easy access voice portal into the HealthVault.

- No special equipment needed.

Harness the power of our technology to fuel your wellness or disease management initiatives.
